PROFESSIONAL SUMMARY

Mobile Application Developer with hands-on experience in developing cross-platform mobile applications for Android and iOS using React Native, as well as native iOS applications using Swift and SwiftUI. Proficient in Swift, JavaScript, TypeScript, Redux Toolkit, REST API integration, URLSession, Firebase, and MVVM architecture. Experienced in building scalable, responsive, and user-friendly applications, integrating APIs, and deploying applications to the Google Play Store and Apple App Store. Strong understanding of mobile application development, debugging, performance optimization, version control using Git and GitHub, and writing clean, maintainable code.

TECHNICAL SKILLS

Programming Languages: Swift, JavaScript (ES6+), TypeScript

Frameworks & Libraries: SwiftUI, React.js, React Native, React Navigation, Axios, TanStack Query

Architecture & State Management: MVVM, Redux, Redux Toolkit, Zustand, Context API

Backend & APIs: REST APIs, URLSession, Firebase Authentication, Firebase Firestore

Data & Storage: Codable, MMKV, AsyncStorage

Mobile Features: Push Notifications, Maps & Geolocation, Deep Linking

Tools & Platforms: Git, GitHub, Xcode, Android Studio, VS Code, App Store Connect, Google Play Console

EXPERIENCE

React Native Developer Intern

January 2026 – July 2026

CodeQuery Pvt. Ltd.

- Developed and maintained cross-platform mobile applications using React Native for Android and iOS.
- Designed and implemented reusable and responsive UI components to enhance user experience and application performance.
- Integrated RESTful APIs and collaborated with backend teams to ensure efficient data communication.
- Implemented payment gateway integrations (Cashfree/Razorpay) to enable secure online transactions and payment processing.
- Managed application state using Redux Toolkit and optimized code for scalability and maintainability.
- Utilized TanStack Query and Zustand for efficient server-state and client-state management.
- Used Git and GitHub for version control and collaborative development.
- Debugged, tested, and optimized applications to improve reliability and performance.
- Published and maintained mobile applications on Google Play Console and App Store Connect, handling application builds, releases, and updates for Android and iOS platforms.

Frontend Developer Intern

Sep 2025 – Dec 2025

Zeeno Tech — Remote

- Developed responsive and scalable web applications using React.js and modern JavaScript (ES6+).
- Converted UI/UX designs into reusable and functional React components.
- Implemented state management and integrated RESTful APIs for dynamic data handling.
- Tested, debugged, and optimized frontend applications to improve performance and user experience.
- Collaborated with team members through Git and GitHub, participated in code reviews, and followed industry best practices.

- Built reusable UI components and contributed to the development of maintainable and user-friendly web interfaces.

““

PROJECTS

E-Commerce Mobile App — React Native, Redux Toolkit, Firebase

- Developed a cross-platform e-commerce application using React Native and Redux Toolkit.
- Integrated REST APIs for product listing, authentication, and order management.
- Implemented Firebase Authentication for secure user login and registration.
- Used AsyncStorage for persistent user sessions and local data storage.
- Designed responsive and reusable UI components to enhance the user experience.

CodeChat — React Native, Firebase Firestore

- Developed a real-time chat application using React Native and Firebase Firestore.
- Implemented real-time messaging and live data synchronization using Firestore listeners.
- Utilized Redux Toolkit for state management and optimized rendering performance for smooth messaging.
- Designed responsive and user-friendly chat interfaces with efficient message handling and persistent user sessions.

Weather App — Swift, SwiftUI, MVVM, OpenWeatherMap API

- Developed a weather application using SwiftUI and the MVVM architecture.
- Integrated the OpenWeatherMap REST API using URLSession and async/await to fetch real-time weather data.
- Parsed JSON responses using Codable and displayed temperature, weather conditions, wind speed, and location details.
- Implemented city-based weather search with loading and error state handling.
- Built a responsive and user-friendly interface using SwiftUI.

EDUCATION

Bachelor of Computer Applications (BCA)

Aryabhatta Knowledge University, Patna, Bihar

CGPA: 8.4/10

2021 – 2024
